

NOTICE

Selection of Participants for Advanced Training on Solar PV and Battery Energy Storage Systems (BESS) for Industrial Settings

(Published date: 15 September 2026)

Pursuant to the public notice published on 14 August 2026, Alternative Energy Promotion Centre (AEPC), Government of Nepal, in collaboration with Practical Action and Gham Power Nepal under the Grid Resilience through Intelligent Photovoltaic System Phase 2 (GRIPS2) Project, invited applications from qualified engineers for a specialized training program. AEPC extends its appreciation to all applicants for their encouraging response.

In view of the overwhelming interest and the growing demand for expertise in Solar PV, Battery Energy Storage Systems (BESS), and smart energy management for industrial applications, AEPC in coordination with GRIPS2 project has decided to conduct the training in two separate parallel sessions. This adjustment has been made to accommodate a larger cohort of qualified participants effectively while maintaining the quality of the program.

Accordingly, the five-day non-residential training is scheduled to be held in Kathmandu from 28 September to 2 October 2026.

Following a comprehensive review of the submitted applications, the shortlisted participants are listed below.
