Invitation for proposal/letter of intent for Purchasing Emission Reduction Credit

(First Date of Publication: 15th July 2021)

Alternative Energy Promotion Centre (AEPC) is a government institution under the Ministry of Energy, Water Resources and Irrigation (MoEWRI) mandated for promotion and development of renewable energy and energy efficiency in Nepal. AEPC has developed a well diversified portfolio of carbon projects using different instruments from renewable energy projects. AEPC succeeded in developing and registering five Clean Development Mechanism Project Activities (Four Project activities related to household biogas technology and one Micro hydro Technology) and three CDM Program of Activities-PoA (Improved Water Mills Technology, Household Biogas Technology and Improved Cookstoves Technology). Being the projects implemented in the least developed country, the project activities and PoAs, apart from reducing GHG emissions from baseline, offer additional sustainable development benefits to the users. AEPC now, would like to invite proposal/letter of intent from interested national/international entities/organizations for purchasing emission reduction credit issued in different vintages as shown below:
