B. Background of the Program

Subsidy is a key financial intervention in the policy of Government of Nepal to promote rural and renewable energy technologies and is executed through AEPC. AEPC with support from various Donor Partners has been continuously working towards improving rural living standard through dissemination of Solar Home System (SHS) and Small Solar Home System (SSHS). Government of Nepal has approved Renewable Energy (RE) subsidy policy and RE subsidy delivery mechanism for implementation of subsidy programme.

As per the approved RE subsidy policy and RE Subsidy delivery mechanism, subsidy for SHS and SSHS can be implemented by reverse auctioning process and by improvised demand driven model through recognized competent company/firm. Under second modality of improvised demand driven model through recognized competent company/firm, the procurement of goods and services will be done by the households themselves. For this purpose AEPC intends to prepare list of recognized competent company/firm. The listed recognized competent company/firm will be responsible for design, supply, and installation and after sales service of SHS and SSHS as per the requirement of household following prevailing RE subsidy policy and RE subsidy delivery mechanism.

This recognized competent company/firm will be eligible for promotion and implementation of Solar Home System.
